

CLAIMS

We claim:

- 5 1. A remote control multimedia content listing system, comprising:
a control station for providing configuration data;
a housing;
a display within said housing;
an electronic system in communication with said display, wherein said
10 electronic system is capable of storing a media guide;
a means for communicating with said control station for receiving said media
guide; and
an input means connected to said electronic system.
- 15 2. The remote control multimedia content listing system of Claim 1, wherein
said input means comprises a keypad.
- 20 3. The remote control multimedia content listing system of Claim 1, wherein
said media guide is comprised of music information and video information.
- 25 4. The remote control multimedia content listing system of Claim 1, wherein
said means for communicating with said control station is comprised of a global
computer network.

5. The remote control multimedia content listing system of Claim 4, wherein said control station includes a web page for receiving media information.

5 6. The remote control multimedia content listing system of Claim 1, wherein said control station includes a web page for receiving media information.

10 7. A method of using a remote control multimedia content listing system system having an electronic system with a communication device, an input device, a display, and a means for communicating with a control station, said method comprising the steps of:

- 15 (a) entering a media record into said electronic system;
- (b) storing said media record within said electronic system into a media storage;
- 20 (c) repeating steps (a) and (b) for additional media records;
- (d) uploading said media storage to said control station;
- (e) determining an identity of media that corresponds with each said media record of said media storage; and
- (f) generating a configuration data for said electronic system that allows said electronic system to display a media guide.

8. The method of using a remote control multimedia content listing system of Claim 7, including the step of:

- 25 (g) transferring said configuration data to said electronic system.

9. The method of using a remote control multimedia content listing system of Claim 8, including the step of:

(h) storing said configuration data within said electronic system.

10. The method of using a remote control multimedia content listing system of

5 Claim 9, including the step of:

(i) displaying said media guide upon said display.

11. A method of using a remote control multimedia content listing system

10 having an electronic system with a communication device, an input device, a display and a means for communicating with a control station, said method comprising the steps of:

(a) accessing a web page of said control station;

(b) inputting media data into said web page; and

15 (c) generating a configuration data for said electronic system that allows said electronic system to display a media guide.

12. The method of using a remote control multimedia content listing system of

20 Claim 11, including the step of:

(d) transferring said configuration data to said electronic system.

13. The method of using a remote control multimedia content listing system of

25 Claim 12, including the step of:

(e) storing said configuration data within said electronic system.

14. The method of using a remote control multimedia content listing system of Claim 13, including the step of:

(f) displaying said media guide upon said display.

5

15. The method of using a remote control multimedia content listing system of Claim 11, wherein said media guide includes a television guide.

10

16. The method of using a remote control multimedia content listing system of Claim 11, wherein said media guide includes a music guide.

15

17. The method of using a remote control multimedia content listing system of Claim 16, wherein said music guide is comprised of information relating to music media contained within a user's home stereo system.

20

18. The method of using a remote control multimedia content listing system of Claim 16, wherein said music guide is comprised of information relating to compact discs contained within a user's home stereo system.

25

19. The method of using a remote control multimedia content listing system of Claim 18, including the steps of:

(d) selecting a media event to be displayed or listened to by said user;

(e) transmitting a control signal to an electronic device to play said media event.
